Отчет по лабораторной работе №7 Оптимизация кода на языке С

Выполнил: Студент: гр. 053502 Герчик Артем Вадимович

Руководитель: ст. преподаватель Шиманский В.В.

СОДЕРЖАНИЕ

- 1. Условие задания
- 2. Реализация
 - 2.1 Изменения в файле config.h
 - 2.2 Оптимизация операции rotate
 - 2.3 Оптимизация операции smooth
- 3. Результаты

1. Условие задания

Это задание связано с оптимизацией кода, интенсивно использующего память. Обработка изображений предлагает множество функций, которым может быть полезна оптимизация. В этой лабораторной работе, мы рассмотрим две операции по обработке изображений: rotate, которая переворачивает изображение против часовой стрелки на 90°, а также smooth, которая "сглаживает" или "размывает" изображение.

Оптимизация поворота

В этой части, вы будете оптимизировать rotate, чтобы достичь как можно более низкого показателя СРЕ. Вы должны скомпилировать driver, а затем запустить его с соответствующими аргументами, чтобы протестировать ваши реализации.

Важно! Замените значения макроопределний в строках 15-19 файла config.h значениями из строки Your CPEs для функции naive_rotate. Эти значения будут использоваться для вычисления ускорения ваших реализаций.

Оптимизация сглаживания

В этой части, вы будете оптимизировать smooth, чтобы достичь как можно более низкого показателя СРЕ.

Важно! Замените значения макроопределний в строках 27-31 файла config.h значениями из строки Your CPEs для функции naive_rotate. Эти значения будут использоваться для вычисления ускорения ваших реализаций.

Правила написания кода:

Вы можете написать любой по вашему желанию код в рамках следующих правил:

- Он должен быть написан на ANSI Си. Вы не можете использовать встроенные операторы ассемблерных языков.
- Он не должен мешать механизму измерения. Не допускается, чтобы код выводил любую постороннюю информацию.

Вы можете модифицировать код только в файле kernels.c. Вам разрешено определять макросы, глобальные переменные и другие процедуры в этих файлах.

2. Реализация

2.1 Изменения в файле config.h

```
/*******************
* config.h - файл, в котором надо заменить значения СРЕ
     для вашей машины для наивных реализаций
     оптимизируемых функций
***********************************
#ifndef CONFIG H
#define CONFIG H
/*
* Заполните значеними СРЕ для базовой (наивной) версии функции
* поворота изображения на вашей машине.
* Запустите ./driver, чтобы получить приведенные значения и
* впишите вместо предложенных.
*/
#define R64 1.4
#define R128 1.5
#define R256 3.7
#define R512 5.6
#define R1024 6.3
* Заполните значеними СРЕ для базовой (наивной) версии функции
* сглаживания изображения на вашей машине.
* Запустите ./driver, чтобы получить приведенные значения и
* впишите вместо предложенных.
*/
#define S32 39.6
#define S64 42.1
#define S128 42.3
#define S256 42.4
#define S512 42.9
#endif/* CONFIG H */
```

2.2 Оптимизация rotate

P.S. Концепция одинакова с нативным, надо сделать как можно больше итераций во втором цикле, до перехода.

```
void rotate(int dim, pixel *src, pixel *dst)
  int i, j;
  int extension = dim*dim;
  dst += extension - dim;
  for (i = 0; i < dim; i += 32)
  {
       for (j = 0; j < dim; j++)
          *dst = *src:
          src += dim;
          *(dst + 1) = *src;
          src += dim;
          *(dst + 2) = *src;
          src += dim;
          *(dst + 3) = *src;
          src += dim;
          *(dst + 4) = *src;
          src += dim;
          *(dst + 5) = *src;
          src += dim;
          *(dst + 6) = *src;
          src += dim;
          *(dst + 7) = *src;
          src += dim;
```

```
*(dst + 21) = *src;
  src += dim;
  *(dst + 22) = *src;
  src += dim;
  *(dst + 23) = *src;
  src += dim;
  *(dst + 24) = *src;
  src += dim;
  *(dst + 25) = *src;
  src += dim;
  *(dst + 26) = *src;
  src += dim;
  *(dst + 27) = *src;
  src += dim;
  *(dst + 28) = *src;
  src += dim;
  *(dst +29)=*src;
  src += dim;
  *(dst + 30) = *src;
  src += dim;
  *(dst + 31) = *src;
   dst = dim;
  src = dim*31 - 1;
dst += 32 + extension;
src += dim*31;
```

```
}
return;
```

2.3 Оптимизация smooth

```
void smooth(int dim, pixel *src, pixel *dst)
      int i, j, k;
       dst[0].red = (src[0].red+src[1].red+src[dim].red+src[dim+1].red)>>2;
      dst[0].blue = (src[0].blue + src[1].blue + src[dim].blue + src[dim+1].blue) >> 2;
      dst[0].green =
(src[0].green+src[1].green+src[dim].green+src[dim+1].green)>>2;
      i = dim*2-1;
      dst[dim-1].red = (src[dim-2].red+src[dim-1].red+src[i-1].red+src[i].red)>>2;
       dst[dim-1].blue =
(src[dim-2].blue+src[dim-1].blue+src[i-1].blue+src[i].blue)>>2;
       dst[dim-1].green =
(src[dim-2].green+src[dim-1].green+src[i-1].green+src[i].green)>>2;
      j = dim*(dim-1);
      i = dim*(dim-2);
      dst[j].red = (src[j].red+src[j+1].red+src[i].red+src[i+1].red)>>2;
       dst[i].blue = (src[i].blue+src[i+1].blue+src[i].blue+src[i+1].blue)>>2;
      dst[i].green = (src[i].green+src[i+1].green+src[i].green+src[i+1].green)>>2;
      j = dim*dim-1;
      i = dim*(dim-1)-1;
      dst[i].red = (src[i-1].red+src[i].red+src[i-1].red+src[i].red)>>2;
       dst[i].blue = (src[i-1].blue+src[i].blue+src[i-1].blue+src[i].blue)>>2;
      dst[j].green = (src[j-1].green+src[j].green+src[i-1].green+src[i].green)>>2;
      i = dim - 1;
      for (j = 1; j < i; j++)
       {
             dst[i].red =
(src[j].red+src[j-1].red+src[j+1].red+src[j+dim].red+src[j+1+dim].red+src[j-1+dim].red+src[j-1].red+src[j-1].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].red+src[j+dim].
